Homeless groups in cities across this country number well over 50. Some in the 100's. Balt., L.A., San FransickO, NY. Funny how it's spreading thru that population so quickly but nothing is being done or reported, only when there is a body to deal with. Seems certain politicians

have found a answer to their city/state homeless problem 🤔
In Baltimore we are organizing mobile first aid/health checks for these groups, as well as elderly, shut ins, shelters, disadvantaged children. We are trying to provide care, test people before overwhelming local

hospitals, and get accurate numbers and overall information to be shared with others across the country.
Many of our people are very highly trained and have provided medical, dental, health care in numerous countries around the world both during crises, and other times, with

various agencies and organizations. It's a good thing we've already started, this looks like it's going to go for months.🙏
I will post updates as we get more communities online and more people organized. We are already getting pushback from local government who believes only in

reaction, mostly when it's too late, but not too late to give them those high stats they want. These politicians have never heard of preventative care beyond a few basic suggestions. Now that everyone is locked down how about we fight back?

So, We the People are going to care, document, and help each other to get this over ASAP.
If anyone has any suggestions, ideas, or contributions for this effort please let us know here and we can get in touch.

For decades myself, and countless others, have traveled around the world caring for and teaching people in every situation, so I know we can do it here. This is you, this is us, it's not a TV commercial anymore, it's outside, upstairs, nextdoor. We are saving Ourselves 🙏🙏🙏

8pm today, governor Hogan has locked down Maryland, even more. We are now ordered to stay in our homes, if we have one. It is now a CRIME to leave ur home for Non essential reasons and there is a fine/jail time. Police are permitted to stop anyone "moving about" to "determine"

If you are outside for a valid reason.
Hogan broke down the Federal assistance and almost ALL of it is going to existing welfare programs. 220 million for local schools, which are closed🤔, must need those votes.

Over 2billion dollars so far and just a few million to "help" people out of work.

"We are only at the beginning of this crises and it will get worse"
No end in sight, removal of Constitutional Rights, BS medical advice, "distancing?", Wash ur hands?, Lots of people do that already, people don't walk around kissing strangers normally, so if this works why is it

Spreading so fast? I do have experience with viruses. It was long ago and it was from a biological weapon

personnel are being isolated, so we have someone to respond "after"

The threat is severe enough that their is no hesitation to remove rights and no fear of losing votes. Very little concern if any about employment or day to day bills.

We obviously aren't being told everything, the real danger, the scope, is this an attack? (Yes).
All you hear about is the spread, if it is so easily"cured" with a couple cheap drugs, why not loosen restrictions and ramp up drug production? It would be cheaper faster, better for

the country. It doesn't make sense, unless the real danger is getting it in the first place? Something like, "we can cure the overt symptoms but what it LEAVES BEHIND is what we are trying to prevent, and not talk about. "For public safety" I'm sure.🤔

If there is going to be"trouble", let's have it now. Now,while we are still healthy, while the country is still strong, when we can still win. We, and the country,are growing weaker every day like this. Less money, less food, less Freedom. And it's very easy to see the Jackals

who exploit and thrive on it. The enemy and their methods have never been more in the open. Any further delay only strengthens them and weakens us. Inaction will allow them to hide again from a stronger position.

TheDS has let their overall plans slip. Escalate the virus as much as possible. Even helping it spread, explains why certain nursing homes/states seem to be affected more than others. With holding medication/supplies to ensure it does. (Reminds me of the old angel of death cases)

Release prisoners, this saves them money on care/housing. And causes crime to rise, giving them another excuse to crack down and grab power. Probably learned it fr Castro cleaning out his jails.

Coronavirus, obviously we aren't being told everything. Distance and quarantine for 2 weeks, 30 day guidelines, yet speeches talk about MONTHS. The introduction of DNA into a virus makes it "sticky". Meaning parts will stay even after being"cured". Like planting seeds.

I have had PDs mentor grad students. It's important to check with both to make sure the mentoring is going well. Also let the student know the PD won't write the letter of Rec if the student doesn't want that.

Also, to any PD who abuses students this way: you suck. Stop. Never joke to an international student about deportation. It's not funny, ever. If you are someone who sees this behavior,
